Subject: Microsoft Settlement

In view of our economy and post 911, the war, massive unemployment and recession, how could anyone feel honestly justified in holding up social and economic progress by voting against the Microsoft Settlement?
Is it competition, jealousy, negativism favoritism, conspiracy, dishonesty, ignorance or What?

Microsoft is an American company. They are big and make money because they earn it.

Microsoft is not the Enemy, they are the Benefactors.

Agree to the Microsoft Settlement and watch the economy improve.
